DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-23 are rejected under 35 U.S.C. 103(a) as being unpatentable over Raasch (US 6,690,776 B1) in view of Olafsson et al. (US 6,912,276 B1, hereinafter "Olafsson").

Raasch discloses a device comprising:

a telephone port (connection 106 to telephone network 108; Figure 1); and

a processor (server modems are associated with an Internet service provider;

col. 3, lines 59-60) adapted to:

establish a modem connection with each of a plurality of modems over a one or more telephone lines (a first server modem 102 establishes connection with a first client modem 104 over analog local loop 112, and a second server modem 102 establishes connection with a second client modem 104 over another analog local loop 110; Figure 1; col. 6, lines 5-10);

exchange data over the modem connection (see Figure 3);

place the modem connection on hold (central site DPCM modem 350 transmits a modem hold 356; col. 10, lines 53-65; col. 11, lines 14-18);

Art Unit: 2643

prevent the hold session from exceeding an individualized hold timeout time limit (a hold-time parameter (357) is either set by the central site DPCM modem 350, the APCM modem, or negotiated at the initial training or at any other time after a communication session has been established; col. 10, lines 59-65; col. 13, lines 12-19).

Raasch differs from claims 1-23 in that the modem connection is terminated when the hold-time period expires, not resumed. However, Olafsson teaches that it is well known to resume the held modem connection after a hold-time period has expired (col. 3, lines 43-49; col. 4, lines 24-27) such that it would have been obvious to an artisan of ordinary skill to allow for resuming a held modem connection, as taught by Olafsson, within the device of Raasch as an alternative to terminating the held modem connection.

Response to Arguments

3. Applicant's arguments with respect to claims 1-23 have been considered but are moot in view of the new grounds of rejection.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not

Art Unit: 2643

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
